Due to the time it would take to put all the data into a html table, I elected to just take a screen shot of my AmiPro text file AFTER the

unofficial patch was implemented.

Some aces need convincing justification to remain in the un-official patch. I **strongly** suggest their replacement by more worthy entries. Even though W. Thaw only had 5 kills, I would like to keep him in, since he served with Lafayette from start to finish.

As for the different Awards and ranks, etc. Here is a complete list:
